 - *No damage to surface*
-
- *Most user friendly whiteboard*
 - *Most advanced cling technology*
 - *Most professional writing surface*

How does it work?

-- Installation Instruction

Just 1 minute!

1. Clean surface

The surface for Cling Easy Whiteboard needs to be clean and free of dirt.

2. Peel off release paper

Tear along dotted line on release paper from one side.

3. Cling to surface

Rub the upper corner onto the wall surface, re-check alignment. To remove or reposition, slowly peel off surface.

4. Remove air bubbles

- For paint walls, just use the fitted tool to remove the bubbles if necessary;
- For glass, varnished wood & tiles, apply moisture to the surface then use the fitted tool to remove air bubbles easily and quickly.

5. Write your dream

Always use dry-erase maker and NOT permanent markers for Detectamet Cling Easy Whiteboard.
